<b>Type 10</b>	Is fitted onto the hub using the nuts and/or bolts supplied in the kit. The wheel is then attached to the spacer using the original bolts and nuts. The spacer has a centre bore to exactly match the diameter of the hub collar.
<b>Type 11</b>	The bolts provided in the kit are long enough to go through the wheel and the spacer to screw directly into the holes in the disc/drum. The spacer has a centre bore and collar to match the diameter of the hub collar and rim centre bore.
<b>Type 12</b>	these universal spacers are fitted between the hub and the wheel using the long bolts provided
<b>Type 13</b>	these universal spacers are fitted between the hub and the wheel using the <i>original</i> nuts or bolts
